### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Connie Thousand on 03/09/2006.

The application has been amended as follows:

The dependency of claim 10 is changed from itself (claim 10 depending from claim 10) to claim 9.

In claim 10 at line 1:

*"defined in claim 10"*, and has been changed to:

- - - defined in claim 9 - - -.

### ***Election/Restrictions***

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 5-10 and 14-19, directed to the species of figs. 2-3 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation

or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 is believed to be allowable as a laser array with the given array of fiber amplifiers, dual beams being delivered to multiple optical parametric amplifiers (OPAs), with corresponding phase modulators and feedback to control the modulators, in the specified component ordering was not found to be taught in the prior art, or an obvious combination of the prior art. Laser array architectures with arrays of fiber amplifiers and phase controlling elements were found to be taught in the prior art, (see US 6366356, and 6061170), as well as similar systems used in conjunction with non-linear crystals for harmonic generation (US 6061170), or frequency mixing (US 6301273). Systems wherein difference frequency generation were also found to be taught (see US 4907238 and 4897562), but it was not found to be obvious to combine the two system types. The multiple OPAs with inputs from each fiber amplifier and each corresponding idler beam, along with the system layout (beam inputs and OPAs located before phase detection and feedback), was found to be a unique addition to laser array architectures of this type.

Claim 11 is allowable as it is a method outlining the operation of the above described system.

Art Unit: 2828

Claims 2-10 and 12-19 are allowable as they depend from allowable claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art documents US 6366356, 6061170, 6301273, 4907238, and 4897562 are all believed to be relevant for the reasons indicated above.
